INDIAN ECONOMY H1 2024

The first half of 2024 has been eventful, not only for the Indian economy but globally. Several countries held general elections in H1 2024, with more to follow in the latter part of the year. India's general elections, the world's largest democratic exercise, concluded with the National Democratic Alliance (NDA) securing a third consecutive term, led by Narendra Modi, who returned as a third-term Prime Minister.

The past few years have profoundly impacted the global economy, causing transitions and adaptations in principles. During this transitional phase, marked by a 'polycrisis' of multiple economic and geopolitical challenges, the Indian economy emerged as a strong performer with a remarkable 8.2% GDP growth in FY24. In April 2024 edition of its flagship report, World Economic Outlook, the International Monetary Fund (IMF) revised the global growth forecasts to 3.2% for 2024 from 3.1% earlier. In contrast, India's growth was projected at a healthier 6.8%. This growth differential (*Refer Chart 1*) underscores India's potential as a major driver of global economic activity.

ECONOMIC REALIGNMENT

Inflation remained well within the tolerance zone, with May 2024 recording a 12-month low of 4.75%. This is a significant improvement compared to two years ago, when CPI inflation was at 7.8% in April 2022. Food inflation remained a key contributor, exacerbated by erratic weather. However, core inflation was more stable, reflecting effective monetary policies and supply-side interventions. The RBI forecasts FY25 inflation at 4.5%.

The RBI has raised the FY25 GDP growth estimate to 7.2% from 7% earlier. The IMF has also recalibrated growth prospects for all countries, including India, due to better resilience and stability expectations, despite some uncertainties.

A Period of Peaks

H1 2024 has seen numerous macroeconomic indicators reaching their peaks, marking a period of substantial economic growth. GST collections were at a record high at INR 2.10 lakh crores in April 2024 (up 12.4% YoY) driven by strong domestic demand. Forex

reserves, a key indicator of overall economic health, hit a new all-time high of USD 656 bn in June 2024.

Strong growth in Sensex and NIFTY highlight the strength of capital markets. In a remarkable achievement, both indices reached all-time highs in the last week of June 2024, with Sensex trading at 79,000 and NIFTY at 24,000. This historic surge reflects robust corporate earnings, sustained foreign investment inflows, and a favourable policy environment.

Strong Economic Metrics

Purchasing Managers' Index (PMI)* for both manufacturing and services sectors indicated expansionary trends. The Manufacturing PMI consistently stayed above the 50-mark throughout the first half, rising to a 16-year high of 59.1 in March 2024, reflecting robust industrial activity. Similarly, the Services PMI showed one of the strongest growth rates in over 13.5 years, reaching 61.2 in the same month, highlighting significant growth in the services sector. (*Refer Chart 2*)

In a remarkable turnaround, India's current account deficit (CAD) has turned surplus after 10 consecutive quarters. This shift marks a crucial milestone in the country's economic recovery, reflecting improved trade balances and stronger service exports. (*Refer Chart 3*)

INDIAN ECONOMY GROWTH POTENTIAL

Chart 1: GDP Growth Projections across the World

Source: IMF WEO Apr 2024, Savills India Research
*Data presented on a fiscal year basis

1. PMI or a Purchasing Managers' Index (PMI) is an indicator of business activity - both in the manufacturing and services sectors. A figure above 50 denotes expansion in business activity. Anything below 50 denotes contraction. Higher the difference from this mid-point, greater the expansion or contraction.

POLICY SUPPORT

Keeping Inflation Under Control

The central bank is committed to maintaining price stability while supporting growth through calibrated monetary measures. The repo rate was held steady at 6.5% for the first half of 2024. This reflects the persistence on the ‘withdrawal of accommodation’ policy to anchor inflation expectations and ensure macroeconomic stability.

Budgetary Announcements

The government presented an interim budget for 2024-25, focusing on the vision of ‘Viksit Bharat’ to elevate India to the status of a developed nation by 2047.

The interim budget maintained its emphasis on capex-driven growth, allocating 3.4% of GDP, equivalent to INR 11.1 lakh crore, up from 3.3% in the previous fiscal year. This strategic increase underlines the commitment to infrastructure development and long-term economic growth. Additionally, it hinted at next-generation reforms aimed at creating an aspirational economy over the next five years, thus setting the stage for future economic and social advancements.

Real Estate Specific Announcements

Direct real estate announcements included the construction of two crore houses in the next five years under the Pradhan Mantri Awas Yojana (Gramin) and intent to launch a scheme to help the middle class buy or build their own houses.

Additionally, several key announcements aimed at benefiting the real estate sector were made. These include enhancing multi-modal connectivity through

economic railway corridor programmes, expansion and strengthening of the electric vehicle ecosystem via manufacturing and charging infrastructure and greater adoption of e-buses, domestic tourism promotion via long-term interest-free loans to states for comprehensive development of iconic tourist centres and related amenities, and the launch of a new scheme for strengthening deep-tech technologies for defence purposes. All these initiatives are expected to revitalise the real estate market and attract more investments into the sector.

A POWER-PACKED YEAR

The Indian economy in H1 2024 has seen robust growth, stable inflation and proactive policy. Despite global headwinds, India’s strategic focus on infrastructure and inclusive growth sustained its momentum.

The real estate sector’s performance for the rest of the year hinges on a multitude of factors, including a series of global events, several domestic state elections, monetary policy and the Union Budget 2024-25; with expectations on income tax resets, deeper infrastructure funding, as well as benefits for housing. Stronger reboots for affordable and mid-segment housing are key. In 2024, India is on course to record all time high demand for industrial, warehousing and office real estate. The PE investment scenario appears significantly improved too. If no major setbacks occur, 2024 could well be an inflection point for the rest of the decade.

Chart-2: Manufacturing & Services PMI of India

Source: S&P Global PMI, Savills India Research

Chart-3: Current Account Balance Trend

Source: Trading Economics, Savills India Research

Manufacturing sector’s share in the GDP is anticipated to increase from 17% in 2023 to 25% by 2025. FDI inflow in the sector surged by 55%, totaling USD 148.9 billion during the period from 2014 to 2023.

GST collection in FY 2023-24 recorded at INR 2,018 billion, the highest since its implementation.

The demand for offices reached a new peak in H1 2024 on the back of strong economic growth, and in some measure, owing to anticipation of political continuum.

The robustness of business confidence is reflected particularly by IT-BPM and BFSI occupier space take-up; which needs to be viewed in the context of mandated return- to-office for employees. The recovery from the pandemic-induced slowdown has been steady. We expect the year to end stronger, creating a record new absorption year.

The pace of new supply infusion is relatively slower, owing to election period approvals and construction schedules. This is expected to improve rapidly in the second half.

In this report, we present a detailed account of office market performance in H1 2024.

H1 2024 demand at an all-time high; new peak in 3 cities

The six1 key office markets of India recorded a gross demand of 34.8 mn sq. ft., a new historic peak registering a 29% annual growth. The demand continues to depict U-shape patterns over the last 10 half-years (refer India Gross Absorption Trend chart), reaching new highs in each of these cycles.

This year, three cities, namely Hyderabad, Mumbai and Pune recorded new absorption peaks of 5.7 mn sq. ft., 6.4 mn sq. ft. and 4.6 mn sq. ft. respectively for the H1 period.

Except Chennai and Delhi-NCR that saw a 3% and 33% decline respectively,

all cities witnessed growth in gross absorption over the last year. Mumbai saw the strongest annual growth of 113% over the last year, followed by Hyderabad and Bengaluru with 59% and 49%, respectively. Pune recorded a 39% growth in demand, with 4.6 mn sq. ft. of absorption levels.

Bengaluru and Mumbai continued to be among the top-3 markets, with Hyderabad making it to the list in H1 2024. Together, these accounted for 63% of the total leasing activity.

¹1Bengaluru, Chennai, Delhi-NCR, Hyderabad, Mumbai and Pune

India Gross Absorption: Last 10 Years

Source: Savills India Research

Large deals continue to dominate

Although large-sized deals (over 100,000 sq. ft.) continued to drive the leasing activity with 43.5% share in total leasing activity, these saw the lowest growth of 17% YOY in absolute terms compared to other segments. Small-sized deals (up to 25,000 sq. ft.) saw the highest annual growth of 47% followed by medium-size deals (25,001-99,999 sq. ft.) which registered 35% YOY growth.

Bengaluru and Hyderabad's leasing activity comprised large deals of 62% each in H1 2024, in contrast to Mumbai where small-size transactions dominated with 39% of its demand.

Tech occupiers led demand

The tech sector led the leasing activity with a 39.3% share in overall absorption, followed by BFSI at 16.9% and flexible workspace at 13.9% respectively.

In volume terms, leasing by the tech sector increased notably by 61% YOY and BFSI by 51%, while the flexible workspace segment saw a 16% YOY decline in take-up.

BENGALURU'S KEY HIGHLIGHTS

Gross leasing secures top spot for Bengaluru: Office leasing in Bengaluru significantly rose by 49% YOY in the first half of 2024. The city continued to lead among the top six cities with 9.7 mn sq. ft. of gross absorption. The ORR, Peripheral East, and SBD micromarkets led the office leasing with 30%, 29%, and 14% share in the overall gross absorption, respectively.

Large size deals driving the leasing activity: The city's leasing activity was primarily driven by large-sized deals (100,000 sq. ft. or more) which accounted for 5.9 mn sq. ft., representing 61% of the overall leasing activity. This was followed by mid-sized deals (25,000-99,999 sq. ft.) totaling 3.0 mn sq. ft. and accounting for a 31% share.

Within the large-sized deals, 82% of the transactions were witnessed in the IT-BPM sector alone. Notably, in absolute volume, the share of IT-BPM in large-sized deals has increased significantly, from 1.1 mn sq. ft. in H1 2023 to 4.8 mn sq. ft. in H1 2024.

OFFICE ABSORPTION (mn sq. ft.) in Bengaluru

LEASING AND COMPLETIONS

Absorption: The city recorded 9.7 mn sq. ft. of gross absorption in H1 2024 as compared to 6.5 mn sq. ft. in H1 2023.

Peripheral East and ORR continue to be the largest contributors to leasing activity in the first half of 2024, witnessing a 35% and 31% YOY increase in leasing, with 2.8 and 2.9 mn sq. ft. of gross absorption, respectively.

A deep dive into micromarket analysis reveals that gross absorption in the Peripheral South micromarket shows a remarkable increase from 0.1 mn sq. ft in H1 2023 to 1.0 mn sq. ft H1 2024, thereby marking a ten-fold increase. This was followed by the SBD City and CBD, which witnessed a 71% and 38% annual increase in leasing in the first half of the year.

Sector Split: The IT-BPM sector, with 6.8 mn sq. ft. of the office absorption, remains the leading sector contributing 70% to the leasing activity. Absorption in the flexible workspaces sector continues to be in line with that of last year's at 1.2 mn sq. ft. However, its share in the city's total absorption has declined to 12% in H1 2024 from 17% in H1 2023.

The city also witnessed significant growth in demand from the BFSI, healthcare and pharma, and engineering and manufacturing segments in H1 2024.

Supply: New completions are recorded at 3.6 mn sq. ft. in H1 2024 witnessing a 56% decline compared to the same period last year.

The micromarkets of ORR and Peripheral East collectively accounted for 63% of the new completions. Of the remaining completions, 21% were in Peripheral North, 14% in Peripheral South, and 2% in the CBD micromarket.

Rental Range H1 2024
(INR/sq. ft./month)

Source: Savills India Research

VACANCY RATE

Overall vacancy rate decreased to 13.1% in H1 2024, from 16.8% in H1 2023 due to heightened demand and limited new completions.

RENTS

Overall, the city’s average rentals have seen an annual increase of 6%, with rentals in some micromarkets going up to 10% YOY.

GRADE-A OFFICE STOCK & VACANCY

Source: Savills India Research

MARKET OUTLOOK

DEMAND

Gross absorption is expected in the range of 17-18 mn. sq. ft. in 2024 on the back of continued demand from occupiers. The city’s favourable business environment and availability of niche talent continue to attract occupiers. Key micromarkets such as SBD City and Peripheral East will continue to drive demand. Growth in demand from GCC occupiers is expected to sustain the leasing activity in the second half of the year.

RENT & VACANCY

Rents are expected to witness an annual increase of 5-6% in 2024. Certain micromarkets such as ORR, North and Peripheral East are likely to witness rise in rentals. With the anticipated momentum in leasing activity and new completions, vacancy levels are expected to be in the range of 13-15% at the end of the year.

SECTORS

The IT-BPM sector will continue to be the primary driver of office demand in the city. Given current market trends, flexible workspaces, especially managed office deals, is expected to continue growing and gain prominence, making a significant contribution to leasing activity. Additionally, increased momentum in sectors such as BFSI and engineering and manufacturing is anticipated to capture a significant share in overall leasing.

SUPPLY

The city is expected to record new supply of approximately 18 mn sq. ft. in 2024. The SBD and Peripheral North micromarkets are projected to be the largest contributors to new supply, with 62% share. ORR and Peripheral South micromarkets are expected to see new completions to the tune of 4.7 mn sq. ft. thus contributing 33% to the total supply in 2024.

Gross absorption represents fresh leases and occupier sale, excludes renewals and pre-commitments

CHENNAI'S KEY HIGHLIGHTS

Mid & small deals dominate the market: Chennai's office market witnessed a shift in deal dynamics, with mid-sized deals in the first half of 2024 contributing to 46% of the overall leasing activity, a significant increase from 18% in H1 2023. The city also witnessed a notable increase in the small deal segment, rising from 11% in the previous year to 26% in H1 2024.

Major traction in office leasing was seen in the OMR Zone 1 micromarket accounting

for 35% of the total market share, followed by MPR, Guindy, and CBD micromarkets. The IT segment predominantly constituted most of the large deals, while the mid-segment deals were led by BSFI and healthcare sectors.

Surge in sector specific deals: IT-BPM continued to spearhead Chennai's office demand, maintaining a resilient stance with a 50% share of total leasing. A heightened momentum from BFSI and

engineering segments was observed as compared to last year, accounting for 15% and 10% of the total market share. Moreover, the city has also experienced a leap in the healthcare-pharma segment with 305,623 sq. ft. of office space in the first half of 2024.

OFFICE ABSORPTION (mn sq. ft.) in Chennai

LEASING AND COMPLETIONS

Absorption: The city saw a gross absorption of about 4.4 mn sq. ft., mainly driven by mid- and small-segment deals, which collectively accounted for 3.2 mn sq. ft. of office leasing, contributing 72% share in the first half of 2024. Large deals (100,000 sq. ft. or more) contributed 28% of the leasing activity.

Most of the leasing activity was focused in OMR Zone 1, which held a market share of 36% in the first half of the year. Meanwhile, the MPR micromarket saw a significant share of the large-sized deals. Guindy and CBD micromarkets also experienced notable increases in leasing activities compared to last year. Collectively, these three markets witnessed 49% of the total leasing activity.

Sector Split: The BFSI segment has gained traction, increasing its share from 12% in H1 2023 to 15% in the first half of the year.

Significant momentum was witnessed in the healthcare-pharma and engineering-manufacturing segment collectively, with about 757,290 sq. ft. of leasing activity. The IT-BPM sector continues to drive the leasing activity accounting for almost 2.2 mn sq. ft. of the market leasing.

Supply: The first half of the year recorded a new supply of 1.7 mn sq. ft. a significant drop of 37%, compared to last year. Further, the city witnessed nearly 90% of the new supply of non-SEZ properties.

Rental Range H1 2024
(INR/sq. ft./month)

Source: Savills India Research

VACANCY RATE

The overall vacancy rate at the end of the first half of the year decreased from 15% to 12%, which is a significant improvement compared to last year.

A significant QOQ decline in vacancy levels has been observed in the selected micromarket of PTR and MPR, owing to strong leasing activity.

RENTS

The city has witnessed a 10% increase in overall average rentals from last year. CBD, OMR Zone 1 and PTR micromarket rentals have also shown an uptick of 5%-6%. This is owing to the increasing demand for office space with the limited available supply.

GRADE-A OFFICE STOCK & VACANCY

Source: Savills India Research

MARKET OUTLOOK

DEMAND

The city is expected to witness leasing activity of about 6 to 7 mn sq. ft. by the end of 2024. The proposed metro connectivity leading to ease in accessibility would most likely build a positive market prospect for the peripheral areas, leading to a probable surge in the property prices in localities like OMR, Porur and Madhavaram.

RENT & VACANCY

Anticipated new supply of 4.3 mn sq. ft. and the state of pre-commitments might lead to a decline in vacancy levels by the end of the year. Nevertheless, average city-wide rentals are expected to be resilient and unlikely to witness any significant change, except for a slight uptick in select micromarkets.

SECTORS

Chennai's office demand is primarily driven by leasing activity in the IT-BPM sector. Due to its diversified industrial portfolio, the city is expected to see significant growth in the engineering-manufacturing and BFSI sectors.

SUPPLY

New completions are expected to be around 4.3 mn sq. ft. by the end of 2024. Together the MPR and OMR Zone 1 micromarkets will witness more than 60% of the new supply, followed by PTR and CBD.

YOY Change
-46%

Gross Absorption
4.0
mn sq. ft.

YOY Change
-33%

Gross absorption represents fresh leases and occupier sale, excludes renewals and pre-commitments

DELHI-NCR'S KEY HIGHLIGHTS

Gross absorption scales back in H1 2024: Delhi-NCR, a consistent leader in office leasing activity, has experienced a 33% YOY decline in absorption, with 4.0 mn sq. ft. recorded in H1 2024. This highlights a notable shift in market dynamics, likely reflecting changes in demand or underlying economic conditions affecting the region. However, this may be temporary, as we anticipate healthy demand for office space in H2 2024 driven by the tech, engineering and manufacturing and flexible workspaces sectors, particularly as the 'return to office' momentum among firms in these sectors continues to strengthen.

Flexible workspaces continue to dominate: Flexible workspaces tops sectoral leasing yet again with a 32% share in the overall leasing basket in H1 2024. This highlights the continued interest of occupiers in shared office spaces as they embrace the evolutionary shift. However, in actual volume terms, the leasing in the sector has decreased by 28% YOY with 1.3 mn sq. ft. of gross absorption witnessed in H1 2024.

The IT-BPM sector, with a total gross absorption of 0.8 mn sq. ft., increased its share to 19.8% in H1 2024 from 12.8% in H1 2023 in the overall leasing, securing the

second position. In absolute terms, the sector's gross absorption remains comparable to the corresponding period a year ago.

The consumer goods & durables sector, notably, with a demand for 0.3 mn sq. ft., secured the third position and contributed an 8% share to the leasing activity. Meanwhile, research & consulting, BFSI, and engineering & manufacturing sectors made substantial contributions with 7.5%, 6.5%, and 6% shares in the region's leasing activity, respectively.

OFFICE ABSORPTION (mn sq. ft.) in Delhi-NCR

LEASING AND COMPLETIONS

Absorption: Delhi-NCR witnessed gross absorption of 4.0 mn sq. ft. in H1 2024, a 33% YOY decrease. The first and the second quarters witnessed equal absorptions of 2.0 mn sq. ft. each.

Gurugram accounted for 62% of the total gross leasing activity, totaling 2.5 mn sq. ft. Within the city, the Secondary Business District (SBD) reported 59% of the leasing activity. This was followed by the Central Business District (CBD) and Peripheral Business District (PBD), which contributed 38% and 3% of the city's leasing activity, respectively.

NOIDA, with 1.4 mn sq. ft. of gross absorption in H1 2024, contributed 35% to the leasing activity of Delhi-NCR. Within NOIDA, the NOIDA Sector 62 Cluster micromarket led office leasing, capturing a 57% share. NOIDA Expressway followed closely with a 42% share, making it the second-largest contributor to city leasing.

Delhi experienced a slowness in leasing activity. The city's contribution to overall leasing decreased to 3% in H1 2024 from 7% reported in H1 2023. Approximately 45% of the absorption in Delhi occurred in Aerocity. This was followed by the Delhi CBD and the South Delhi Business District micromarkets, each contributing 29% and 26% share, respectively, in leasing at a city level.

Demand driven by mid-sized deals: Leasing activity in the Delhi-NCR region was driven by mid-sized deals in the range of 25,000-99,999 sq. ft. that constituted 50% of the total commercial office space demand generated in H1 2024. Of the mid-sized deals, approximately 63% were reported in the micromarkets of Gurugram CBD & Gurugram SBD.

NOIDA Expressway stood as the 3rd top micromarket with 24% of the mid-sized deals. Flexible workspaces with 21% share emerged as the key sector to have contributed significantly to the mid-sized transactions. Apparently, large-sized transactions (100,000 sq. ft. and above) constituted 31% of the total office demand in H1 2024. Flexible workspaces and IT-BPM, with 65% and 35% share, respectively, turned out to be the two dominating sectors to have witnessed large-sized transactions.

Supply: New supply infusion decreased by 46% YOY with 1.3 mn sq. ft. of new completions during H1 2024. NOIDA Expressway and Gurugram SBD with cumulatively 86% share in the overall supply witnessed the maximum infusion. Majority (~53%) of new supply comprised commercial office spaces.

Rental Range H1 2024
(INR/sq. ft./month)

Source: Savills India Research

VACANCY RATE

Overall vacancy levels have declined from 21.5% in H1 2023 to 18.2% in H1 2024 as leasing overtakes new completions during the first half of the year.

RENTS

The average rental value in Delhi-NCR increased 3% YOY at a regional level. Gurugram SBD micromarket with 16% YOY growth registered the highest increase followed by Gurugram PBD and Gurugram CBD that witnessed 13% and 5% rise in average rental, respectively. This is followed by South Delhi Business District micromarket which saw rentals going up by 3% in H1 2024 on an annual basis.

GRADE-A OFFICE STOCK & VACANCY

Source: Savills India Research

MARKET OUTLOOK

DEMAND

The leasing momentum faced a setback in the first half of 2024 due to limited Grade-A inventory at reasonable rentals, forcing occupiers to seek unsaturated markets with relatively low rental office spaces. However, the outlook for the second half of the year is optimistic, with increased leasing activity anticipated. This is expected as occupiers move past the wait-and-watch approach following the general elections and re-evaluate their leasing and portfolio strategies. Consequently, the annual demand for 2024 is projected to be around 12.0-13.0 mn sq. ft.

RENT & VACANCY

The region is expected to witness 4.5 mn sq. ft. of new completions in H2 2024. Higher demand, combined with limited Grade-A office supply, is projected to bring the vacancy rate down to 14-15% or even lower. Average rentals may experience a marginal increase due to high demand, particularly in Gurugram and NOIDA.

SECTORS

The leasing activity in Delhi-NCR is expected to continue to be driven by flexible workspace operators and IT-BPM occupiers. Other established sectors like research & consulting, engineering and manufacturing, healthcare and pharma, and BFSI sectors are also expected to contribute significantly to the overall leasing activity.

SUPPLY

Delhi-NCR has a pipeline of around 4.5 mn sq. ft. in H2 2024. Majority of the new completions (~70%) will be concentrated in NOIDA. Within NOIDA, 81% of the supply is expected along NOIDA Expressway, while in Gurugram 66% of the new supply will be concentrated in Gurugram CBD micromarket.

Gross absorption represents fresh leases and occupier sale, excludes renewals and pre-commitments

HYDERABAD'S KEY HIGHLIGHTS

Strong demand propels Hyderabad to Third spot in country leasing:
Hyderabad's office market has grown rapidly with 5.7 mn sq. ft. absorption in H1 2024. This marked a 54% YOY growth in transaction activity.

The substantial increase in transactions was led by SBD-I, accounting for 76% of the total absorption constituting 4.3 mn sq. ft. of office space.

OFFICE ABSORPTION (mn sq. ft.) in HYDERABAD

LEASING AND COMPLETIONS

Absorption: The city's leasing activity was primarily driven by large-sized deals (100,000 sq. ft. or more) which accounted for 3.5 mn sq. ft. representing 62% of the overall leasing activity, with a staggering 55% YOY increase. Majorly, these deals were concentrated in the SBD I micromarket.

This was followed by mid-sized deals (25,000-99,999 sq. ft.) totaling 1.8 mn sq. ft. and accounting for a 32% share.

The gross absorption in the SBD II micromarket shows a remarkable increase from 0.5 mn sq. ft. in H1 2023 to 1.0 mn sq. ft. in H1 2024.

Sector Split: The IT BPM and healthcare-pharma sectors continue to dominate the leasing activity with 1.8 mn sq. ft. and 1.4 mn sq. ft. respectively in the first half of the year.

Absorption in the BFSI sector continues to be in line with that of last year's at 0.5 mn sq. ft. However, its share in the city's total absorption has declined to 10% in H1 2024 from 16% in H1 2023.

Furthermore, the city has experienced a rise in flexible workspaces, with 1.0 million sq. ft. of office space leasing activity accounting for 67% YOY growth.

Supply: The city witnessed a supply of 2.7 mn sq. ft. in the first half of 2024, a significant drop of 64% compared to H1 2023. However, the new supply was almost evenly split between SBD-I and SBD-II, with each micromarket accounting for 52% and 48% of the total supply, respectively.

(INR/sq. ft./month)

Source: Savills India Research

VACANCY RATE

Hyderabad’s office market has witnessed a YOY decline in the vacancy rate to 22.4% from 24.6% due to heightened demand and limited completions. SBD I continues to be the preferred market for most large occupiers and GCCs.

RENTS

Overall, the city’s average rentals have seen an annual increase of 2%, with rentals in some locations in SBD I registering growth up to 9% YOY.

MARKET OUTLOOK

DEMAND

A robust momentum is expected to persist for office demand in the city, with an anticipation of about 10 mn sq. ft. of leasing activity in 2024. SBD I and SBD II will continue to be the markets of choice for large GCCs and occupiers due to quality supply and excellent infrastructure.

RENT & VACANCY

Buoyant demand and limited availability in the SBD I micromarket is expected to drive rentals upwards by 5-6% by the end of the year. With the expected momentum in leasing and new completions especially in SBD II, vacancy levels are expected to be range bound between 30-31%.

SECTORS

The IT-BPM and healthcare-pharma sectors continue to drive demand. BFSI, gaming and flexible workspaces occupiers will also be key drivers in H2 2024 for the city.

SUPPLY

The city is expected to see approximately 20-22 mn sq. ft. of new supply in 2024. The SBD I and II micromarkets are expected to contribute over 90% of the expected supply.

Gross absorption represents fresh leases and occupier sale, excludes renewals and pre-commitments

MUMBAI'S KEY HIGHLIGHTS

Mumbai is the second largest demand market in H1 2024: With gross absorption of 6.4 mn sq. ft. in H1 2024, Mumbai's share in India's top six cities* rose to 18% from 11% in H1 2023. Further, with 5.1 mn sq. ft. of supply infusion in H1 2024, its share in all-India supply increased to 29% from 4% in H1 2023. Mumbai has been gaining momentum from the latter half of 2023 which continues in H1 2024 as it climbs up to the second place (only after Bengaluru) in terms of absorption. In addition to gross leasing of 6.4 mn sq. ft.,

the city also registered renewals amounting to about 5.3 mn sq. ft. in H1 2024. This is reflective of positive occupier sentiment in the market.

Bank expansions facilitate doubling of BFSI leasing: Significant expansion by BFSI (Banking, Financial Services and Insurance) occupiers was noted as they registered a 2X leasing of 2.2 mn sq. ft. in H1 2024 as compared to 1.1 mn sq. ft. in H1 2023. Reflective of strengthening Indian financial system, BFSI companies of

Indian origin contributed a significant 73% to this leasing. For reference, the Indian stock exchanges, including BSE and the NSE, have emerged as global leaders in IPOs for the year 2023, registering about 77 listings[^]. Large-sized deals of over 100,000 sq. ft., accounting for about 25% share, were mainly signed by the BFSI occupiers in the micromarkets of Western Suburbs II while mid-sized deals of between 25,000 and 99,999 sq. ft. were witnessed in Central Mumbai.

*Top six cities: Bengaluru, Chennai, Delhi-NCR, Hyderabad, Mumbai, Pune

OFFICE ABSORPTION (mn sq. ft.) in Mumbai

LEASING AND COMPLETIONS

Absorption: Mumbai recorded Grade-A gross absorption of 6.4 mn sq. ft. during H1 2024, more than double of that registered in the corresponding period of the previous year. Navi Mumbai, Western Suburbs II and Eastern Suburbs were the most preferred micromarkets by occupiers together garnering about 56% share of the overall demand. This could be attributed to large space take-up by BFSI and transport & logistics occupiers in the micromarkets of Western Suburbs II and Eastern Suburbs respectively. Sub-dollar rents are attracting technology and Global Capability Centres (GCC) occupiers to Navi Mumbai.

Sector Split: The BFSI segment continued to be the demand driver during H1 2024, garnering a 35% share in overall gross absorption. This was followed by significant expansion by technology occupiers garnering a 17% share, as compared to 6% in H1 2023. Noteworthy, flexible workspace operators gained share from 5% in H1 2023 to 8% in H1 2024 as they expanded significantly, mainly in the micromarkets of Navi Mumbai and the New CBD BKC.

Supply: Mumbai witnessed 5.1 mn sq. ft. of Grade-A supply infusion during H1 2024, registering a decadal half-yearly peak. This is equivalent to 5X of the quantum registered in H1 2023. Majority of the new supply was in the form of non-IT developments in the micromarkets of Western Suburbs II, Eastern Suburbs and Central Mumbai.

Rental Range H1 2024
(INR/sq. ft./month)

Source: Savills India Research

VACANCY RATE

Amidst significant gross absorption and limited supply infusion, overall vacancy levels in the city declined to 10.7% at the end of June 2024. Notably, barring select micromarkets of Central Mumbai, Western Suburbs II, Eastern Suburbs and Navi Mumbai, all others are operating at alarmingly low sub-5% vacancy.

RENTS

In the backdrop of robust leasing, citywide Grade-A quoted rental values strengthened marginally. The rent increase in the micromarket of New CBD BKC can be attributed to availability of limited supply amidst robust demand for front-office spaces.

GRADE-A OFFICE STOCK & VACANCY

Source: Savills India Research

MAJOR TRANSACTIONS H1 2024

MARKET OUTLOOK

DEMAND

Mumbai is expected to sustain similar momentum in 2024 as witnessed in 2023. We estimate 2024 to clock in Grade-A gross absorption of about 10.0 mn sq. ft. We recommend occupiers looking for large contiguous spaces to consider micromarkets such as Central Mumbai, Western Suburbs I and Thane that will likely see new supply infusion.

RENT & VACANCY

Amidst significant supply infusion (that is mostly pre-committed) and sustained occupier interest, the vacancy rate is anticipated to come down to 10% at the end of December 2024. Overall Grade-A rental values may marginally appreciate on account of declining vacancies in prime buildings and city infrastructure upgrades becoming operational.

SECTORS

We expect the conventional demand driver of BFSI segment, along with technology occupiers to continue to drive office leasing demand in H2 2024. The flexible workspace segment is likely to sustain similar levels of leasing momentum in 2024. We may witness increased momentum from the healthcare & pharma segment that recorded thrice the absorption in H1 2024 on YOY basis.

SUPPLY

Significant new supply of 3.2 mn sq. ft. is scheduled to be completed during H2 2024, taking the full-year supply to 8.3 mn sq. ft. This planned supply would mostly be concentrated in the micromarkets of Western Suburbs I (44%), Thane (28%) and Central Mumbai (14%).

YOY Change
37%

Gross absorption represents fresh leases and occupier sale, excludes renewals and pre-commitments

PUNE'S KEY HIGHLIGHTS

BFSI occupiers gain share in Pune's leasing activity: The BFSI (Banking, Financial Services and Insurance) sector garnered a 35% share in the leasing activity in Pune to emerge as the dominant demand driver during H1 2024. This marked a notable change from the previous year, where IT-BPM had led the leasing activity in H1 2023. At 1.6 mn sq. ft. in H1 2024, BFSI registered a 28% YOY increase. In the overall BFSI leasing in

India*, Pune contributed a 27% share standing at the second place only after the country's financial capital, Mumbai. The preferred micromarkets of BFSI occupiers were the CBD, SBD East and SBD West.

Occupiers' preference shifts to mid-sized deals: Mid-sized deals of 25,000-99,999 sq. ft. accounted for a 41% share in Grade-A gross absorption during H1 2024. These were mainly signed by technology

occupiers. On the other hand, engineering & manufacturing occupiers preferred small-sized deals of less than 25,000 sq. ft. In contrast, large-sized deals of over 100,000 sq. ft. dominated the leasing activity in H1 2023. Interestingly, flexible workspace operators, which previously dominated large-sized deals, have now shifted their focus to mid and small-sized office spaces.

OFFICE ABSORPTION (mn sq. ft.) in PUNE

LEASING AND COMPLETIONS

Absorption: Pune witnessed Grade-A gross absorption of 4.6 mn sq. ft. during H1 2024, registering a rise of 37% YOY, marking the highest half-yearly absorption observed in the last decade. 31% of the gross absorption was concentrated in the micromarkets of CBD and SBD East each, followed by 19% in SBD West, 18% in PBD West and the remaining 1% in PBD East.

Sector Split: During H1 2024, BFSI replaced the IT-BPM sector to take the pivotal position in driving the leasing activity with a 35% share. IT-BPM accounted for 22% of the total leasing. Engineering and manufacturing also contributed significantly to the leasing activity with a share of 16%. The remaining 27% share was distributed among consumer goods, e-commerce, research & consulting, energy & chemicals, and pharma & healthcare occupiers.

Supply: Pune witnessed supply infusion of 2.9 mn sq. ft. during H1 2024, 21% lower than that registered in H1 2023. Additional supply mirrored the robust office demand in the micromarkets of CBD, SBD East and SBD West, as 82% of the overall supply in the city was concentrated in these micromarkets. A majority 78% of the new supply was in the form of IT developments, 22% as non-IT developments.

*Top six cities: Bengaluru, Chennai, Delhi-NCR, Hyderabad, Mumbai, Pune

Rental Range H1 2024
(INR/sq. ft./month)

VACANCY RATE

As demand exceeded supply, the city’s office market saw a decline in overall vacancy rates, from 17.1% in June 2023 to 13.5% in June 2024. Notably, barring select micromarkets of PBD East and PBD West, all others are operating at sub-10% vacancies.

RENTS

City-wide quoted rental values appreciated by 10% YOY as new supply added by institutional landlords in the market commanded higher market rents.

GRADE-A OFFICE STOCK & VACANCY

Source: Savills India Research

MARKET OUTLOOK

DEMAND

The Pune office market is expected to maintain its strong performance throughout 2024. Supported by pre-commitments of 0.2 mn sq. ft. that are likely to be absorbed during H2 2024, the market is expected to record around 8.0 mn sq. ft. of gross absorption in 2024.

RENT & VACANCY

Quoted rental values are likely to remain stable across all micromarkets in 2024. Amidst significant supply infusion and robust leasing activity, we expect the vacancy rate to hover around 14%-15% at the end of December 2024.

SECTORS

We expect continued interest from BFSI as well as technology occupiers to drive leasing activity during 2024. The micromarkets of CBD, SBD East and SBD West are likely to attract occupier attention due to expected infusion of quality supply offering large contiguous spaces.

SUPPLY

New supply of 5.9 mn sq. ft. is scheduled to be completed during H2 2024. Interestingly, more than half of this planned supply is likely to be concentrated in the micromarket of SBD East while the remaining will be equally distributed amongst the other micromarkets including the CBD and SBD West.
